

THE RECOMMENDATION

Stop selling tanks. Start selling **proof**.

The brief asks for growth outside government tenders. A private buyer does not want a tank, they want an outcome they can show a regulator. The licence from a defence research body is credibility, not a moat, because a direct competitor holds the same one. So sell what is hard to copy: **dependable operation, documented compliance and productive water reuse**, priced as an annual contract on the 428 accounts this analysis has already identified by name.

THE ARGUMENT IN FIVE MOVES One slide each. These five are the entire submission. Cover, executive summary and appendix sit outside the limit, as the brief permits.

01 SEGMENTATION

Three buyers where one person signs

Seven buyer types screened down to the three that can decide quickly.

02 MARKET

Market size, and the 428 accounts inside it

We size the opportunity, then name the specific properties within it.

03 ROADMAP

Grow inside a service radius first

Year 1 uses the sales footprint the company already discloses.

04 RISK

Working capital, not competition

Unpaid customer bills already equal about 90% of yearly revenue.

05 PORTFOLIO EXPANSION

Adjacent products, ranked and sequenced

Seven adjacent technologies scored. Proving performance is what makes every one repeatable.

FROM THE REGISTER TO THE RUN RATE Each step is a narrower claim than the one before it. The scope widens only where the label says it does.

9,498

Goa properties scored.
Every one on the state register

428

Worth winning and winnable.
The Year 1 call list, Goa hotels

₹2.4 Cr

Year 1 new revenue.
9 to 12 sites drawn from that list

₹23.6 Cr

Year 3 run rate. Three states and four buyer types, on ₹12.0 Cr today

The growth question is framed as a product question. The market data says it is a **reliability** question, and the company has already, quietly, bought the parts needed to answer it.

01 THE MOAT THAT IS NOT

The bio digester design licensed from the national defence research body is **licensed across the industry**. Banka BioLoo reports over 10,000 bio-toilets across 22 states. **P**

The company's own filings disagree with each other. The risk section calls the licence perpetual, while the certificate table records an expiry of 26 July 2027. **CD**

02 THE FAILURE THAT IS REAL

80%+

OF 22 BENGALURU SITES LACKED A TRAINED OPERATOR

2 in 3

OF 35 SAMPLED PLANTS EXCEEDED BOD STANDARDS AT LEAST ONCE

Two peer reviewed studies: 22 Bengaluru site visits, and 279 systems with effluent tested at 35. Some were **switched off overnight**. **P**

Buyers are not short of vendors. They are short of plants that visibly work.

03 THE PARTS THE COMPANY ALREADY OWNS

DIGITAL PAANI

Remote monitoring partner, cuts upkeep cost

BACTREAT

BITS Pilani spin out. Won a ₹2.64 Cr order

SUBSCRIPTION

Monthly rental for small packaged plants

3 M LITRES

Recycled daily for hotels, industry, housing

An extension of what the company discloses, not an invented pivot. **CD**

THE TWO PART ANSWER first an instrument to find the buyer, then an offer to sell them

STEP 1, FIND THE ACCOUNT AND THE MOMENT

A ranking model that scores each parsed property in the state register on need, on when it is next forced to act, and on what the job is worth.

We refer to it in this deck as **JalPulse**.

NEED

how the plant fails

TIMING

licence renewal date

VALUE

size and reuse worth

9,498 properties narrowed to 428 reachable accounts

STEP 2, SELL A GUARANTEED OUTCOME

A service contract covering the plant, its upkeep and the water it recycles, priced on performance rather than on the tank.

We refer to it in this deck as **JalLoop**.

COMPLY

servicing and lab tests

ASSURE

guaranteed running time

REUSE

metered recycled water

Every claim backed by a published performance record

THE SHIFT

A one time sale becomes a renewable contract

Margin that compounds instead of repeating from zero.

WHERE WE START computed, not chosen

The 428 winnable accounts, counted by taluka.

SEE THE LIST ➤

Bardez	366
Salcete	33
Tiswadi	12
Pernem, Mormugao	14
All other talukas	3

86% of winnable accounts sit in one taluka. One service crew can cover them, so Goa comes first on economics rather than sentiment. **D**

WHAT THE OPPORTUNITY IS WORTH revenue, year on year

Growth compounds because upkeep renews. ₹12.0 Cr becomes ₹23.6 Cr, and the largest single year step is ₹4.6 Cr, well inside the ₹86 Cr we can serve.

THE DECISION WE ARE ASKING FOR

Approve a **pilot across 9 to 12 sites**, being 4 hotels, 4 housing societies and 2 to 4 institutions, with pass marks **and walk away rules agreed up front**.

This is not a rollout. It is a test the company is allowed to fail cheaply.

➔ If reliability is what the company sells, the first question is **who actually buys reliability**, and who signs for it.

The disqualifier is not size. It is **whether one identifiable person can say yes**, and that single test reorders the entire market.

THE FULL UNIVERSE

each scored 1 to 5

TYPE OF BUYER	SPEND	TRIGGER	SPEED	VERDICT
Hotel or resort owner	4	5	5	TOP 3
Housing developer	5	5	3	TOP 3
Hospital or food plant	5	4	3	TOP 3
Housing society	3	2	1	YEAR 2
Charity funded body	3	2	2	IF IT COMES
Factory with wet waste	4	2	2	YEAR 2
Individual homes	1	1	4	EXCLUDE

Spend

measures job size.

Trigger

measures visibility of the purchase moment.

Speed

measures approval time.

The four we defer are slower, not smaller.

WHERE EACH BUYER SITS

value of the work against how hard the sale is. Green zone means high value and one decision maker

▲

VALUE OF THE WORK →

TARGET ZONE

Hotel or resort
the owner signs

Housing developer
largest single jobs

Hospital or food plant
highest repeat value

Individual homes
too small to serve

Factory waste
every site differs

Housing society
a committee votes

Charity funded
slow to pay

→

Quick, one person decides

HOW HARD THE SALE IS →

Slow, a committee or a tender decides

Why housing societies wait.

The need is real and the plants they inherit are often failing, but a committee has to vote and there is no technical staff to judge us. We win hotels first, then bring societies the evidence.

Why charity funded work is not a team.

The strength here is the company's existing government and charity relationships CD. Take the work when those produce it, but do not staff a sales force against a slow paying buyer.

THE THREE WE PURSUE FIRST

every field the brief asks for, labelled as a five step sales motion

	1HOTEL OR RESORT, THE OWNER OR GENERAL MANAGER	2HOUSING DEVELOPER, THE PROMOTER OR PROJECT DIRECTOR	3HOSPITAL OR FOOD PLANT, THE FACILITIES OR SAFETY HEAD
1 How they find us	Ranked outreach timed to their pollution licence renewal, plus the consultant already on site	We watch new filings on the housing regulator's portal and reach them at design freeze, before a consultant fixes the specification	Renewal notices on their operating licence, plus the government and charity relationships the company already holds CD
2 Who actually signs	👤👤 One signature The owner or general manager. The environmental consultant can veto.	👤👤👤 Two The promoter or project director, plus the consultant who writes the spec.	👤👤👤👤👤 Nobody alone Plant head, facilities and safety decide together. Finance releases the money.
3 What they will pay	₹15 to 30 lakh ₹10 L ₹3 Cr A packaged plant, a digester and the first year of upkeep A	₹25 lakh to 2.5 crore ₹10 L ₹3 Cr By size of project, paid against build milestones A	₹20 lakh to 2.5 crore ₹10 L ₹3 Cr Quoted only after a laboratory test on their actual waste A
4 How we close them	A free two day water audit, a right sized plant, ninety days of proven running , then a service contract	Free design help before tender, a fit report, then two years of us operating it before handover	A laboratory test before we quote, a modular plant, a guarantee written against their intended reuse, plus remote monitoring
5 Why they say no	"My plant is fine." ⌵ We test it free. A failed sample against their own licence argues better than any brochure.	"The cheapest compliant option wins." ⌵ True at handover, which is why we sell two years of operation instead.	"Procurement needs three quotes." ⌵ We compete on a guaranteed result a price only bidder cannot underwrite.

→ These three are not abstractions. For Goa hotels we can **name every one of them**, and rank them in order.

Sized from three public registers rather than a bought report, so **every number below traces back to a named property or a filed project**, and the account list refreshes itself as those registers update.

WHERE THE NUMBERS COME FROM

all public registers

HOTELS · THE 9,498 THE MODEL AT RIGHT SCORES

Hotels on the Goa tourism register

P

9,498

Of those, 20 rooms or more

858

Of those, 10 to 19 rooms

1,103

HOUSING · A SEPARATE BUYER, SIZED IN THE FUNNEL BELOW

Housing projects still to finish

P

468

Flats registered in them

36,194

Villas registered in them

4,207

THE TIMING SIGNAL

P

A hotel's licence from the state pollution board **lasts ten years**, and renewal takes ninety days above 50 rooms. That gives **a dated, repeating moment** when the owner is forced to look at the plant.

HOW THE MODEL NARROWS A REGISTER INTO A CALL LIST

9,498

parsed properties, each given **one score out of 100**, the three signals below added at their weightage

read left to right. The top of the market, then the slice we can serve, then the funnel

WHY ONE IN EIGHT MUST ACT EACH YEAR

RENEWAL FALLS DUE →

Ten year cycle **P** gives one in ten. New openings make it one in eight. **A**

WHY ₹20 LAKH FOR AN AVERAGE JOB

The company prices a digester from ₹30 K and a full plant up to ₹2.5 Cr **CD**. A hotel sized job sits mid scale.

HOW THE ₹750 CRORE TOP IS BUILT

1

Goa has 858 hotels of 20 rooms and up, plus 468 filed housing projects, that need a plant

1,326 sites

2

Apply that same density to the 43 million Tier 2 and 3 town residents in the three states, cut 40% for inland towns **A**

37,600 sites

3

One in ten renews its consent each year, and an average job is ₹20 lakh

≈ ₹750 Cr

Working down instead, from the national figure the company cites **CD**, gives about ₹1,000 Cr. Same order, two directions.

HOW THE ₹86 CRORE IS BUILT

THE TWO SLICES WE CAN COUNT · ONE METHOD, TWO SCALES

	SITES	× DUE	× FIT	× JOB	A YEAR
Goa hotels	805	12%	55%	₹20 L	₹10.6 Cr
Goa housing	468	12%	55%	₹50 L	₹15.4 Cr

Due is the share whose consent falls this year, fit the share that qualifies on budget, job the average order **A**. On hotels alone the cautious case is ₹6.0 Cr and the optimistic ₹19.6 Cr.

THEN THE SAME METHOD ON THE REST

Both counted slices above

₹26.0 Cr

Institutions, and the named clusters in Karnataka and Maharashtra **A**

₹60 Cr

Serviceable market

₹86 Cr

That ₹60 Cr: about 4 M urban residents in those clusters, at roughly half Goa's ₹28.6 Cr per million, since they lack its tourism trade. **A**

₹750 Cr

₹86 Cr

₹21 Cr

₹2.4 Cr

TOTAL ADDRESSABLE MARKET

Annual. Private buyers across three states **D**

SERVICEABLE MARKET

Annual. Three segments inside named clusters **D**

THREE YEAR NEW REVENUE

Cumulative. Years 1 to 3, with ₹11.6 Cr in Year 3 **D**

YEAR 1 NEW REVENUE

Annual. Twelve sites within delivery capacity **D**

YEAR 3 ILLUSTRATIVE ANNUAL RUN RATE

₹12.0 Cr

+

₹11.6 Cr

=

₹23.6 Cr

FY25 company revenue **CD**

Year 3 new annual revenue

illustrative run rate

₹21 Cr = 2.4 + 7.0 + 11.6, the three year plan in Section 3. Year 3's ₹11.6 Cr is 13% of the ₹86 Cr we can serve.

→ 428 accounts is a target, not a plan. **What the company can reach and service** is what sets the three year sequence.

SECTION 3 THE THREE YEAR PLAN

A guarantee cannot be sold further than it can be honoured. **Every gate below is a service capability the team must prove, not a sales target it must hit.**

THE THREE YEAR PLAN states, town size, buyers and the gate that opens the next phase. Targets rise as the company matures, so running time starts at 90% and reaches 95% only in Year 3					
PHASE	STATES AND TOWNS	TOWN SIZE	BUYERS WE GO AFTER	PROGRESSION KPIS, ALL MUST CLEAR TO OPEN THE NEXT PHASE	NEW SALES
YEAR 1 Prove it works No new geography	Goa. Bardez first, then Salcete, Tiswadi and Pernem. North Karnataka. Belgaum, Hubli and Dharwad	Tier 2 and 3	Hotels from the 428 list. Housing developers, reached through filed project records	Plant running time, across pilot sites ≥ 90% Scheduled laboratory samples taken 100% Customers willing to act as a reference ≥ 3 Average days taken to get paid ≤ 75	₹2.4 Cr
YEAR 2 Repeat it Next door only	Coastal Maharashtra. Sindhudurg, Ratnagiri, Sangli, Satara, Kolhapur. Coastal Karnataka. Mangaluru, Udupi, Mysuru	Tier 2 and 3	Add hospitals, campuses and food plants. Selected housing societies, now that we hold Year 1 evidence	Trained service partners, per cluster ≥ 1 New sales that also buy an upkeep contract ≥ 40% Revenue that returns without being resold ≥ 30% Housing societies acting as a reference ≥ 1	₹7.0 Cr
YEAR 3 Scale it	Chosen clusters across all three states, run through certified partners rather than direct staff	Tier 2 and 3	The full priority list. Factory effluent opens as a fourth buyer	Plant running time, now the mature standard ≥ 95% Upkeep contracts renewed at term ≥ 85% Plants under remote watch ≥ 200 Partner sites passing our quality audit ≥ 90%	₹11.6 Cr

WHY THIS ORDER AND NO OTHER

one crew can hold a promise across about 150 km

YEAR 1

Zero new geography

BardezSalceteBelgaumHubli

428 accounts already inside the van's range

YEAR 2

One ring further out

SindhudurgKolhapurMangaluru

Each new town borders a cluster we have already proved

YEAR 3

Partners carry it

Certified local firms extend the reach without our own vans

Only after the audit shows they hold the standard

Distance sets the sequence.

A four-hour callout breaks the promise, so expansion follows driving time.

THE YEAR 1 GATE ITSELF a pilot of 9 to 12 sites, with pass marks and walk away rules written down before it starts			
4 hotels from the 428 list 4 housing developments or societies 2 to 4 hospitals or food plants Mixed on purpose, so all three buyers face one standard.	PASS MARKS, AGREED UP FRONT Plants running at least 90% of the time. Every laboratory sample taken. Treated water meeting the standard for its use, with 30 to 50% reused on site. Urgent call outs answered inside 48 hours.	WHEN WE WALK AWAY A site that keeps failing. A customer who refuses meters, since without measurement there is no proof. A site with no real use for recycled water. Terms that leave us funding the customer's plant.	What would change our mind. If plants run well but owners still will not pay extra for the guarantee, the idea is wrong and we should compete on price.

Selling a service stretches the time between doing the work and being paid for it. **Unpaid customer bills already stand at about 90% of a year's revenue** CD, so how the offer is priced and collected matters more than how the plant is built.

RISK REGISTER severity as dots, and the arrow marks the direction that spells trouble			
WHERE IT SITS	WHAT GOES WRONG	THE SIGNAL WE WATCH	WHAT WE DO ABOUT IT
COMPETITIVE ●●●●	The defence licence is not exclusive . Banka BioLoo reports over 10,000 bio-toilets across 22 states. Two rivals undercut us on running cost with designs that need no power, and a third publishes its prices openly. P	▼ Win rate on deals where we were not the cheapest quote	Do not compete on the price of the tank. Sell the guarantee, and publish measured running time as the basis anyone can compare us on. Staying neutral about technology wins more pricing power than defending one design. Owner: managing director and sales head
DISTRIBUTION AND CHANNEL ●●●●	On housing deals the consultant writes the specification before we are in the room. Later, growing through partners dilutes the very service quality we are selling.	▼ Share of housing deals where we were named before tender	Give design help free before tender so we are written into the specification. Register deals with consultants so they are paid for bringing us in. Certify and audit every partner before Year 2 opens. Owner: project execution head
FINANCIAL ●●●● the serious one	₹10.86 crore of unpaid bills against ₹12.01 crore of yearly revenue CD . A monthly subscription quietly turns a supplier into a lender, so growth itself becomes the danger rather than the cure. IPO proceeds already went partly to working capital CD . That eases it, it does not remove it.	▲ Average days to get paid	Never fund the customer's equipment. Money up front in stages, a payment on commissioning, automatic monthly collection for upkeep, and outside finance for the large plants. Payment behaviour is a walk away rule in the pilot. Owner: chief financial officer
OPERATIONAL ●●●●	The market's failure becomes our liability the moment we sell a guarantee. More than 80% of 22 Bengaluru sites lacked trained staff. In a separate 35-plant sample, more than two-thirds exceeded BOD standards at least once. P	▲ Unplanned visits per plant each quarter	Standard designs rather than one off builds. Operators trained and certified before we hand a plant over. Remote monitoring through the partnership already in place. Spare parts held locally, not at head office. Owner: service head
REGULATORY AND REPUTATION ●●●●	The company's own prospectus contradicts itself on the defence licence. The risk section calls it perpetual, while the certificate table records an expiry of 26 July 2027. CD	Written confirmation on file, before anything is printed	Get the live position in writing before the licence appears in any sales material. In parallel, make it commercially unimportant by moving the proof onto measured performance instead. Owner: managing director and company secretary

RISKS WE ARE CHOOSING TO ACCEPT saying so out loud is part of managing them			
A slower first year. Stay inside the service radius, even if that means declining distant jobs.	Losing on price. Skip the cheapest quote and win on measured performance and renewal.	Housing comes later. Committee decisions would absorb the pilot capacity needed for quick evidence.	Red line. No meter means no proof, no guarantee and no contract.

Competitors already publish warranties, AMC and monitoring offers. EPBL should test whether one integrated commercial system creates a stronger, renewable contract.

Nothing here rests on a private data set. **Every figure traces to a government register, a company filing, or an assumption we have written down and labelled.**

GOVERNMENT AND PUBLISHED SOURCES P

- **Goa tourism register**
9,536 listed, 9,498 parsed. Updated 23 April 2026.

3 Score
Rank size, timing and reach

4 Write out
Export the 428 list and tables

WHAT THE LABELS MEAN

-  Register or study
-  Company filing
-  Derived from sources
-  Assumption below

EVERY ASSUMPTION WE MADE with what would replace each one with evidence. The model weightages of 40, 35 and 25%, and the 14 to 35% upkeep mix, are settings rather than estimates

ASSUMPTION	WHAT WE USED	WHY THAT NUMBER, AND WHAT WOULD SETTLE IT PROPERLY
 Share forced to act each year	10, 12, 15%	A ten year licence cycle means about a tenth of the base faces a compliance moment yearly  , plus new openings. <i>Settled by</i> per property licence dates, which the board holds but does not publish.
 Share we can qualify	50, 55, 65%	Accounts inside the radius, with budget authority, not tied to a rival. <i>Settled by</i> the pilot's conversion record.
 Average order value	₹15 to 25 L hotel ₹50 L housing	Mid point of the company's own published range, for a plant plus first year upkeep  . A housing project carries a larger plant, so it is priced higher inside that same range.
 Size band that signals an owner can sign	20 to 120 rooms	Room count standing in for independent ownership. <i>Known weakness</i> , a franchise run hotel of that size is wrongly counted as winnable.
 Scaling Goa density outward	40% cut 43 M, then 4 M	Goa has far more hotels per resident than an inland district, so its density is cut 40% before being applied to the 43 M Tier 2 and 3 residents across the three states, and at roughly half the Goa rate to the 4 M inside the named clusters. A judgement, not a measurement.
 Distance one crew can cover	about 150 km	The radius inside which a call out can still be answered within two days. It sets the whole geographic sequence.

WHAT WE DO NOT CLAIM

- **We do not claim the whole register**
38 of the 9,536 rows would not parse, so 9,498 were scored.
- **We do not claim to know who owns each property**
Room count stands in for a local decision maker. It is not verified ownership.
- **We do not claim a renewal date per property**
The board publishes the ten year cycle only, so timing is a cadence, not a diary.
- **We do not claim the top of the funnel is counted**
The ₹750 crore is reasoned from density. Only the serviceable and deliverable figures rest on named properties.
